

Thank you for taking the first step on an eco-friendly journey to fewer mosquitos in your yard!

Here are some important tips to ensure success:

- ✓ Put your bucket out at the 1st sign of mosquitos, usually mid-May. Position in a cool shady place such as under a bush, away from family gathering spots.
- ✓ Put an alert in your calendar to remind you to add a fresh piece of dunk to your buckets every month. If extra debris has fallen in, replace water at the same time.

**** buckets will become a mosquito breeding ground if dunks are not added monthly ****

- ✓ Two buckets are recommended for the average Roeland Park yard but larger lots may benefit from 3-4 buckets. Dark colored buckets work best.
- ✓ Extra mosquito dunks may be purchased at local hardware stores.
- ✓ Remove standing water (see attached sheet for more details).
- ✓ Invite your neighbors to participate – the more people that participate, the better the mosquito control!.

* Family Friendly * Pollinator Friendly * Wallet Friendly * **MOSQUITO DEADLY** *
